

# Advance ASA-VType/310C

## Digital 2-Needle Lockstitch Conveyorised Sewing Machine for attaching Keder/SEG

### Juki LH-4578C Machine Head

- Digital twin needle lockstitch with auto thread trimmer, backtack, and footlift
- Sewing head is fully accessible for maintenance and service
- Fabric detection sensor to finish seams perfectly every time
- Easy stitch size to belt speed synchronisation

### Repositionable

- Improved mobility
- Machine is on wheels and movable after installation

### Keder/SEG Feed

- Deskills the process of attaching silicone edges
- Ideal for making tension-framed soft signage with mitred corners

### Digital Interface

- Panasonic HMI touchscreen control panel is easy to use and allows for settings to be changed quickly

### Accessible Control Box

- UKCA and CE certified
- Servo motors & drive
- Fabric detection sensor to finish seams automatically

## Technical Specifications

- Conveyor Length: 3000mm (can be altered)
- Conveyor Belt Width: 1000mm (can be altered)
- Machine Height: 900mm as a standard
- Power Requirements: 240V
- Air Requirements: 5 Bar

## Twin Needle Lockstitch
