

Juki DLN-9010A-SS

1 NEEDLE, NEEDLE-FEED LOCKSTITCH MACHINE

The Juki DLN-9010A-SS is a user-friendly lockstitch machine which uses a needle-feed mechanism to avoid ply-shifting when sewing fabrics such as denim, multiple layers, or slippery materials such as Lycra. It is equipped with a direct-drive motor and features automatic functions such as thread trimming, backtack, and footlift for increased efficiency and productivity. The semi-long arm also expands the working area for ease of use.

This model is ideal for sewing light to medium weight fabrics, and produces consistently neat and unpuckered seams.

APPLICATIONS

A classic lockstitch looks the same on both sides of the fabric and is perfect for general sewing where seams aren't required to stretch. This machine is ideal for apparel production, but if you have any questions about your individual requirements then please speak to our friendly team and we'll be happy to help.
